RICHARD W. NUTTER
AGRICULTURAL COMMISSIONER

Richard E. Rominger, Director
Department of Food and Agriculture

and

The Honorable Board of Supervisors
County of Monterey

Gentlemen:

In compliance with the provisions of Section 2279 of the California Agricultural Code, I am pleased to submit the Monterey County Agricultural Crop Report for the calendar year 1978.

Monterey County's gross value for 1978 agricultural crops totalled \$658,494,300. This is an increase of \$159,983,750. over the 1977 crop production year. This value places Monterey County fourth in California's production and sale of agricultural products.

Heavy rains and flooding plagued County growers through most of the period that is normally used for the planting of Spring crops. This, in turn, limited the supply of fresh vegetables through the Spring and early Summer harvest periods. Vegetable crop prices soared to an all time high during this time frame.

Wine grapes showed another dramatic increase, as more bearing acreage came into production. This crop jumped from the number six position in our crop ranking to number two, following lettuce.

The cattle industry has started to recover from the disastrous years of the drought as producers continue to increase their livestock inventories.

Other commodity groups, such as tomatoes and sugar beets, were affected adversely by the wet periods.

As in past years, inflation continues to plague growers with production, transportation, fuel, marketing, and other related costs increasing.

A review of past annual crop reports reflects a dramatic picture of agriculture's capability to respond to not only conditions caused by Mother Nature, but those caused by economic and political decisions.

Agricultural research has been responsible for the high productivity of the crops in this County. Continued technological advancements throughout agriculture have made it possible for many growers to increase yields, and improve quality beyond expectations. Were it not for these developments, many of the crops shown in this report would no longer be grown here.

The values represented in this report are gross receipts of the producers, and do not take into account the various costs of production, marketing, or transportation. No attempt is made to reflect net income of the producer.

My thanks to the individuals and firms whose cooperation made this report possible, and to my staff members, under the direction of Deputy Agricultural Commissioner Don Rochester and Senior Agricultural Inspector Bill Nutley, who coordinated and compiled this report.

Very truly yours,

A handwritten signature in cursive script that reads "Richard W. Nutter". The signature is written in dark ink and is positioned above the printed name and title.

Richard W. Nutter
Agricultural Commissioner

RWN:mls

C R O P H I G H L I G H T S - 1 9 7 8

The total gross value of the Monterey County Agricultural Industry for 1978 was \$658,494,300. This was an increase of \$159,983,750 over the 1977 crop year. An increase of \$19,839,400 in the Fruit and Nut category was due mainly to an increase in bearing Grape acreage, plus an increase in price per ton.

Total vegetable crops showed a gain of \$128,122,200. The leading crops responsible for this increase were: Lettuce, up \$93,936,000, Carrots, \$5,401,000, Cauliflower, \$6,722,000, Celery, \$11,992,000, Mushrooms, \$6,915,000, and Green Onions, \$2,310,000. Tomatoes showed a loss of \$6,427,000 from the 1977 figures.

Field Crops dropped in value from the previous year by a total of \$4,864,850. Sugar Beet acreage, production, and value accounted for most of this loss.

Nursery Crops increased increased \$5,608,000 in value, primarily due to increased production, and value of cut flowers.

Livestock, Poultry, and Dairying rose \$9,730,800. The main increase in this area came from Cattle and Calves, which were up \$7,368,000 from 1977.
